

Worktribe™ Enterprise Document Management

Worktribe™ is a fully integrated Enterprise Document Management suite, employing advanced Web 2.0 features for real-time document collaboration, annotation and workflow.

Worktribe is a highly cost-effective solution for bringing control of all documents, records and digital assets into a single integrated platform, with facilities to capture, organise, reuse and share critical information assets backed by a secure granular permission system and automated audit trail.

Worktribe leads the document management field for its intuitive and powerful web interface, providing visual tools to manage workflow, metadata, enterprise search and real-time in-browser document collaboration.

Office integration with automatic versioning, change control, notifications and permissions ensures that users can keep their familiar tools with the organisational benefit of transparent centralised storage and management.

Worktribe increases efficiency and facilitates information flow, ensuring a smooth transition from traditional paper-based systems to a fully electronic paperless solution.
