

Worktribe™ Print Management Workflow

Worktribe Print Management Workflow is a job tracking, pricing and estimating system to manage the materials procurement process. This system enables:

- Automatic job estimating, approvals, delivery tracking and invoice reconciliation
- Management of print job specifications
- Automated job costing from agreed rate cards with rostered suppliers
- Print order approval workflow and electronic submission of print orders to suppliers
- Stock management and delivery tracking at warehouses
- Electronic supplier invoicing and reconciliation
- Extensive management reporting and granular permission system
- Real-time document collaboration, annotation, versioning, workflow and reporting
- The use of indicators such as traffic light icons to show status at a glance, immediate data validation and dialogue for user input
